Appl. Statist. (2003)
52, *Part* 4, *pp.* 511–513

Index of authors, volume 52, 2003

Aerts, M. See under *Shkedy, Z.*
Allcroft, D. J. and Glasbey, C. A. A latent Gaussian Markov random-field model for spatio temporal rainfall disaggregation 487
Allen, T. T., Yu, L. and Schmitz, J. An experimental design criterion for minimizing meta-model prediction errors applied to die casting process design 103
Allison, D. B. See under *Gadbury, G. L.*
Amar, D. See under *Leung, D. H.-Y.*
Atkinson, A. C. Horwitz's rule, transforming both sides and the design of experiments for mechanistic models 261
Banerjee, M. See under *Basu, S.*
Basu, S., Sen, A. and Banerjee, M. Bayesian analysis of competing risks with partially masked cause of failure 77
Battaglia, F. and Fenga, L. Forecasting composite indicators with anticipated information: an application to the industrial production index 279
Berger, Y. G. and Skinner, C. J. Variance estimation for a low income proportion 457
Besbeas, P., Lebreton, J.-D. and Morgan, B. J. T. The efficient integration of abundance and demographic data 95
Beutels, P. See under *Shkedy, Z.*
Böckenholt, U. Analysing state dependences in emotional experiences by dynamic count data models 213
Bois, F. Y. See under *Mezzetti, M.*
Brockwell, A. E., Chan, N. H. and Lee, P. K. A class of models for aggregated traffic volume time series 417
Carpenter, J. R., Goldstein, H. and Rasbash, J. A novel bootstrap procedure for assessing the relationship between class size and achievement 431
Chan, N. H. See under *Brockwell, A. E.*
Chau, P. H., Yip, P. S. F. and Cui, J. S. Reconstructing the incidence of human immunodeficiency virus (HIV) in Hong Kong by using data from HIV positive tests and diagnoses of acquired immune deficiency syndrome 237
Chave, A. D. and Thomson, D. J. A bounded influence regression estimator based on the statistics of the hat matrix 307
Chen, V. C. P., Günther, D. and Johnson, E. L. Solving for an optimal airline yield management policy via statistical learning 19
Coles, S. and Pericchi, L. Anticipating catastrophes through extreme value modelling 405
Cui, J. S. See under *Chau, P. H.*
Dellaportas, P. See under *Linardakis, M.*
Dey, D. K. See under *Sinha, D.*
Dryden, I. L., Scarr, M. R. and Taylor, C. C. Bayesian texture segmentation of weed crop images using reversible jump Markov chain Monte Carlo methods 31
Duchateau, L., Janssen, P., Kezic, I. and Fortpied, C. Evolution of recurrent asthma event rate over time in frailty models 355
Farewell, V. T., Lawless, J. F., Gladman, D. D. and Urowitz, M. B. Tracing studies and analysis of the effect of loss to follow-up on mortality estimation from patient registry data 445
Fenga, L. See under *Battaglia, F.*
Fortpied, C. See under *Kezic, I.*
Gadbury, G. L., Page, G. P., Heo, M., Mountz, J. D. and Allison, D. B. Randomization tests for small samples: an application for genetic expression data 365
Gardner, I. A. See under *Georgiadis, M. P.*
Georgiadis, M. P., Johnson, W. O., Gardner, I. A. and Singh, R. Correlation-adjusted estimation of sensitivity and specificity of two diagnostic tests 63

Gladman, D. D. See under *Farewell, V. T.*
Glasbey, C. A. See under *Allcroft, D. J.*
Goldstein, H. See under *Carpenter, J. R.*
Günther, D. See under *Chen, V. C. P.*
Haberman, S. See under *Renshaw, A.*
Heffernan, J. E. and Tawn, J. A. An extreme value analysis for the investigation into the sinking of the M. V. Derbyshire 337
Heo, M. See under *Gadbury, G. L.*
Hickey, K. A. See under *Upton, G. J. G.*
Hirst, D., Storvik, G. and Syversveen, A. R. A hierarchical modelling approach to combining environmental data at different scales 377
Hoggart, C. J., Walker, S. G. and Smith, A. F. M. Bivariate kurtotic distributions of garment fibre data 323
Hutton, J. L. See under *Kwong, G. P. S.*
Ibrahim, J. G. See under *Mezzetti, M.*
Janssen, P. See under *Duchateau, L.*
Johnson, E. L. See under *Chen, V. C. P.*
Johnson, W. O. See under *Georgiadis, M. P.*
Kammann, E. E. and Wand, M. P. Geoadditive models 1
Katsura, K. See under *Ogata, Y.*
Kezic, I. See under *Duchateau, L.*
Knorr-Held, L. and Richardson, S. A hierarchical model for space–time surveillance data on meningococcal disease incidence 169
Kuk, A. Y. C. A generalized estimating equation approach to modelling foetal response in developmental toxicity studies when the number of implants is dose dependent 51
Kwong, G. P. S. and Hutton, J. L. Choice of parametric models in survival analysis: applications to monotherapy for epilepsy and cerebral palsy 153
Lawless, J. F. See under *Farewell, V. T.*
Lebreton, J.-D. See under *Besbeas, P.*
Lee, P. K. See under *Brockwell, A. E.*
Leung, D. H.-Y., Wang, Y.-G. and Amar, D. Early stopping by using stochastic curtailment in a three-arm sequential trial 139
Lin, H.-M., Williamson, J. M. and Lipsitz, S. R. Calculating power for the comparison of dependent κ-coefficients 391
Linardakis, M. and Dellaportas, P. Assessment of Athens's metro passenger behaviour via a multiranked probit model 185
Lipsitz, S. R. See under *Lin, H.-M.*
Mezetti, M., Ibrahim, J. G., Bois, F. Y., Ryan, L. M., Ngo, L. and Smith, T. J. A Bayesian compartmental model for the evaluation of 1,3-butadiene metabolism 291
Molenberghs, G. See under *Shkedy, Z.*
Morgan, B. J. T. See under *Besbeas, P.*
Mountz, J. D. See under *Gadbury, G. L.*
Ngo, L. See under *Mezzetti, M.*
Ogata, Y., Katsura, K. and Tanemura, M. Modelling heterogeneous space–time occurrences of earthquakes and its residual analysis 499
Page, G. P. See under *Gadbury, G. L.*
Patra, K. See under *Sinha, D.*
Pericchi, L. See under *Coles, S.*
Rasbash, J. See under *Carpenter, J. R.*
Renshaw, A. and Haberman, S. Lee–Carter mortality forecasting: a parallel generalized linear modelling approach for England and Wales mortality projections 119
Richardson, S. See under *Knorr-Held, L.*
Ryan, L. M. See under *Mezzetti, M.*
Scarr, M. R. See under *Dryden, I. L.*
Schmitz, J. See under *Allen, T. T.*
Sebastiani, M. R. Markov random-field models for estimating local labour markets 201
Sen, A. See under *Basu, S.*
